This list covers a number of space-saving alternatives, from mini drip coffee makers to non-electronic brewers small enough to store in cupboards. Compact coffee makers tend to be more affordable than standard sized ones (win-win!), so it may also be an opportunity to experiment with less familiar options like The French Press or Pouring. Both can be found at prices as low as \$20, some even cheaper than that. To keep your kitchen clutter free, here are the best small coffee makers to buy. What we like a little cheaper than most Keurigs Amazing Versatility Shops up to nine K-cups A few colorways that we don't like to have to fill water before every coffee use is not the hottest There's no doubt about it, Keurig is one of the most favorite names in coffee. The company's K-cup pods are easy to use and offer a wide range of coffee, teas, and more, making this 5-inch wide coffee maker perfect for people who appreciate convenience in a small space. The under-storage bin contains nine K-cup pods to keep them handy and slides in front of the brewer when not in use. If you want your coffee to be a little stronger than usual, all you need is a click. This brews out 6-12 ounces of coffee, simply adding that amount to a removable tank. If you're not sure how much coffee your mug is holding, you can use this to fill the tank, so you'll never overflow the cup, and if someone forgets the cup, the drip tray can hold all the liquid for easy removal and cleaning. With the drip tray removed, you can cook directly into the mug traveling up to seven inches high. The coffee maker shuts down for 1 1/2 minutes after cooking. If you want to store the coffee maker between uses, the cord stores are neatly at the back of the brewer, so that it won't tangle when the brewer rests on the shelf in the pantry. For such a small machine, the K-Mini Plus offers a significant number of features, from K-Cup storage to bolder brew settings. - Derek Rose, coffee and tea expert on spruce eats what we wanted to easily use includes reusable filters Fast Brewing What We Don't Like Little Versatility Small Capacity No automatic turn off a small, affordable coffee maker, it doesn't have much frills, but it doesn't have much frills. If you can't wait for the first cup, this stops the brewing process so you can pour the cup without making a mess. A permanent filter is on so you'll never need paper filters. What we like is the programmable up to 24 hours Automatic Shutdown GoldTone filter included two options for coffee strength that we don't like quite expensive too high for some cabinets Although no one would accuse this brewer of being miniature, it packs a lot of features into a relatively narrow footprint, including a 12-cup carafe and a 60-ounce reservoir. Ninja coffee makers get good reviews in general from users who appreciate a few brew settings and the taste of coffee. Own process of thermal extraction gets the best taste from the base without unnecessary bitterness. If you rush for the first cup, you can pause brewing so you can pour the cup without making a mess. What we like is the Big Cream Easy to use a removable water tank that we didn't like the expensive loudest rather slow for the Nespresso machine While the Nespresso Inissia is more of an espresso machine than a standard coffee maker, this tiny item is perfect for making specialty drinks like lattes and cappuccinos while saving space in the kitchen. Inissia is often sold in a bundle deal that includes Milk Aeroccino frother; Depending on your preferences, it may be more convenient that the coffee maker and foam two separate parts as they will be easier to store. Inissia only accepts the original Nespresso capsules and can brew two different cup sizes: a 1.35-ounce espresso shot and a 5-ounce espresso lunge. The water tank is on the smaller side, as expected, but it cooks lightning fast in less than 30 seconds. Like most Nespresso machines, this item is extremely easy to use and can depend on making consistent drinks for years to come. What we like is a fair price for a machine with a meat grinder Adjustable Coffee Strength Unique shape, suitable for cabinets That we don't like Blade grinder, not burrs Small potential Difficult to clean under 12 inches tall, this compact brewer will fit into most cabinets, getting it from your counter and aside when it's not in use. Its elegant design is similar to a Chemex-rounded glass bodywork, cork or rubber band, but it comes with a permanent stainless steel filter, so you don't have to buy countless paper. Capacity can be a problem for a true coffee addict, since this model has only 17 ounces, roughly equivalent to two or three cups of Joe. However, Bodum also produces goods in two larger sizes: 34 and 51 ounces. Customers give Bodum Pour Over high marks, especially with regard to its value for money and ease of cleaning (just remove the cork or gum and toss an item in the dishwasher). A meagre number of reviews mention chipped or breaking, but this is to be expected from any glass coffee maker. Size and price make it a great gift option, so keep it in mind for holidays, birthdays, or just because of the days. Pour-over coffee makers often produce a richer flavor than standard drip coffee, and they are especially great for individual use. - Derek Rose, coffee and tea expert on spruce eats what we like the consistent taste and temperature of the Removable coal water filter that we did not like as non-programmable No automatic turn off the water tank prone to leakage While brewing coffee with pods is certainly convenient, it can be expensive and create much more waste than ground coffee. This slim 5-cup brewer saves space and eliminates waste by allowing you to use your favorite grounds. Other perks include a removable water tank for easy filling and keeping a warm plate that can be turned on and off with a side switch. One common complaint is that the water tank is prone to leakage, but this does not happen to most users. The company provides a one-year warranty if this is a problem. What we like is an affordable durable and long-lasting hot plate with a thermal carafe that we didn't like the limited versatility of leaky carafe Is difficult to remove the carafe lid This little coffee maker from Cuisinart has four cups of carafe, so you can make enough coffee to share or enjoy on your own, and it has a pause function so you can grab your first cup before brewing is done.
